Office Action Summary

Art Unit: 2184

**Part III     DETAILED ACTION**

**Drawings**

1.     This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

**Specification**

2.     Claims 1-51 are presented for examination.

**Double Patenting Rejections**

3.     Claim 1-51 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. patent 6,167,520, claims 1-68 of U.S. Patent 6,092,194 and claims 1-44 of U.S. patent 6,154,844. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed subject matter contains obvious modifications to previous claims 1-8 of U.S. patent 6,167,520, claims 1-68 of U.S. Patent 6,092,194 and claims 1-44 of U.S. patent 6,154,844.

Art Unit: 2184

As to claims 1, 12, 22, 33, 48, and 50 these claims include limitations of: monitoring the operating system, interrupting processing of the request, comparing information pertaining to the Downloadable against a predetermined security policy, and performing a responsive action based on the comparison, which already included in claims 1-8 of U.S. patent 6,167,520, claims 1-68 of U.S. Patent 6,092,194 and claims 1-44 of U.S. patent 6,154,844. It is well settled that the omission of an element and its function [i.e., linking by the inspector or preventing execution of the Downloadable by the client] is an obvious expedient if the remaining elements perform the same function as before. In re Karlson, 136, USPQ 184 (CCPA 1963). Also note Ex parte Rainu, 168 USPQ 375 (Bd. App. 1969). Therefore, omitting various elements from the previous claimed subject matter would have been obvious to one of ordinary skill in the art in this case since the remaining elements do in fact perform the same functions as before. Elimination/Changing of an element or its function will not serve as a basis for patentability.

4. The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. In re Vogel, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37

Art Unit: 2184

C.F.R. § 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 C.F.R. § 1.78(d).

**Allowable Subject Matter**

9. Claims 1-51 are allowable over the prior art of record. However, these claims are still subject to the rejection discussed in paragraph 3 above.

**Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. A shortened statutory period for response to this action is set to expired THREE (3) months, ZERO days from the date of this letter. Failure to respond within the period for response will cause the application to be abandoned. 35 U.S.C. 133.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dieu-Minh Le whose telephone number is (703) 305-9408.
